# Contents

**1 Purpose of the Project** **vi**
- 1.1 User Business . . . vi
- 1.2 Goals of the Project . . . vi

**2 Stakeholders** **vi**
- 2.1 Client . . . vi
- 2.2 Customer . . . vi
- 2.3 Other Stakeholders . . . vi
- 2.4 Hands-On Users of the Project . . . vi
- 2.5 Personas . . . vi
- 2.6 Priorities Assigned to Users . . . vi
- 2.7 User Participation . . . vii
- 2.8 Maintenance Users and Service Technicians . . . vii

**3 Mandated Constraints** **vii**
- 3.1 Solution Constraints . . . vii
- 3.2 Implementation Environment of the Current System . . . vii
- 3.3 Partner or Collaborative Applications . . . vii
- 3.4 Off-the-Shelf Software . . . vii
- 3.5 Anticipated Workplace Environment . . . vii
- 3.6 Schedule Constraints . . . vii
- 3.7 Budget Constraints . . . vii
- 3.8 Enterprise Constraints . . . viii

**4 Naming Conventions and Terminology** **viii**
- 4.1 Glossary of All Terms, Including Acronyms, Used by Stakeholders involved in the Project . . . viii

**5 Relevant Facts And Assumptions** **viii**
- 5.1 Relevant Facts . . . viii
- 5.2 Business Rules . . . viii
- 5.3 Assumptions . . . viii

**6 The Scope of the Work** **viii**
- 6.1 The Current Situation . . . viii
- 6.2 The Context of the Work . . . viii
- 6.3 Work Partitioning . . . ix

6.4 Specifying a Business Use Case (BUC) . . . . . ix

**7 Business Data Model and Data Dictionary** **ix**
7.1 Business Data Model . . . . . ix
7.2 Data Dictionary . . . . . ix

**8 The Scope of the Product** **ix**
8.1 Product Boundary . . . . . ix
8.2 Product Use Case Table . . . . . ix
8.3 Individual Product Use Cases (PUC's) . . . . . ix

**9 Functional Requirements** **ix**
9.1 Functional Requirements . . . . . ix

**10 Look and Feel Requirements** **x**
10.1 Appearance Requirements . . . . . x
10.2 Style Requirements . . . . . x

**11 Usability and Humanity Requirements** **x**
11.1 Ease of Use Requirements . . . . . x
11.2 Personalization and Internationalization Requirements . . . . x
11.3 Learning Requirements . . . . . x
11.4 Understandability and Politeness Requirements . . . . . x
11.5 Accessibility Requirements . . . . . x

**12 Performance Requirements** **x**
12.1 Speed and Latency Requirements . . . . . x
12.2 Safety-Critical Requirements . . . . . xi
12.3 Precision or Accuracy Requirements . . . . . xi
12.4 Robustness or Fault-Tolerance Requirements . . . . . xi
12.5 Capacity Requirements . . . . . xi
12.6 Scalability or Extensibility Requirements . . . . . xi
12.7 Longevity Requirements . . . . . xi

**13 Operational and Environmental Requirements** **xi**
13.1 Expected Physical Environment . . . . . xi
13.2 Wider Environment Requirements . . . . . xi
13.3 Requirements for Interfacing with Adjacent Systems . . . . . xii
13.4 Productization Requirements . . . . . xii

13.5 Release Requirements . . . . . xii

**14 Maintainability and Support Requirements** **xii**
14.1 Maintenance Requirements . . . . . xii
14.2 Supportability Requirements . . . . . xii
14.3 Adaptability Requirements . . . . . xii

**15 Security Requirements** **xii**
15.1 Access Requirements . . . . . xii
15.2 Integrity Requirements . . . . . xii
15.3 Privacy Requirements . . . . . xiii
15.4 Audit Requirements . . . . . xiii
15.5 Immunity Requirements . . . . . xiii

**16 Cultural Requirements** **xiii**
16.1 Cultural Requirements . . . . . xiii

**17 Compliance Requirements** **xiii**
17.1 Legal Requirements . . . . . xiii
17.2 Standards Compliance Requirements . . . . . xiii

**18 Open Issues** **xiii**

**19 Off-the-Shelf Solutions** **xiii**
19.1 Ready-Made Products . . . . . xiii
19.2 Reusable Components . . . . . xiv
19.3 Products That Can Be Copied . . . . . xiv

**20 New Problems** **xiv**
20.1 Effects on the Current Environment . . . . . xiv
20.2 Effects on the Installed Systems . . . . . xiv
20.3 Potential User Problems . . . . . xiv
20.4 Limitations in the Anticipated Implementation Environment That May Inhibit the New Product . . . . . xiv
20.5 Follow-Up Problems . . . . . xiv

**21 Tasks** **xiv**
21.1 Project Planning . . . . . xiv
21.2 Planning of the Development Phases . . . . . xv

**22 Migration to the New Product** **xv**
22.1 Requirements for Migration to the New Product . . . . . xv
22.2 Data That Has to be Modified or Translated for the New System xv

**23 Costs** **xv**

**24 User Documentation and Training** **xv**
24.1 User Documentation Requirements . . . . . xv
24.2 Training Requirements . . . . . xv

**25 Waiting Room** **xv**

**26 Ideas for Solution** **xv**

**27 Appendix — Generative AI Use Disclosure** **xvi**
27.1 AI Tools Used . . . . . xvi
27.2 How and Where Used . . . . . xvi
27.3 Verification of AI-Generated Content . . . . . xvi

**28 Appendix — Reflection** **xvii**

# Revision History

| Date | Version | Notes |
|---|---|---|
| Date 1 | 1.0 | Notes |
| Date 2 | 1.1 | Notes |

# 1 Purpose of the Project

## 1.1 User Business

*Insert your content here.*

## 1.2 Goals of the Project

*Insert your content here.*

# 2 Stakeholders

## 2.1 Client

*Insert your content here.*

## 2.2 Customer

*Insert your content here.*

## 2.3 Other Stakeholders

*Insert your content here.*

## 2.4 Hands-On Users of the Project

*Insert your content here.*

## 2.5 Personas

*Insert your content here.*

## 2.6 Priorities Assigned to Users

*Insert your content here.*

### 2.7 User Participation

*Insert your content here.*

### 2.8 Maintenance Users and Service Technicians

*Insert your content here.*

## 3 Mandated Constraints

### 3.1 Solution Constraints

*Insert your content here.*

### 3.2 Implementation Environment of the Current System

*Insert your content here.*

### 3.3 Partner or Collaborative Applications

*Insert your content here.*

### 3.4 Off-the-Shelf Software

*Insert your content here.*

### 3.5 Anticipated Workplace Environment

*Insert your content here.*

### 3.6 Schedule Constraints

*Insert your content here.*

### 3.7 Budget Constraints

*Insert your content here.*

### 3.8 Enterprise Constraints

*Insert your content here.*

## 4 Naming Conventions and Terminology

### 4.1 Glossary of All Terms, Including Acronyms, Used by Stakeholders involved in the Project

*Insert your content here.*

## 5 Relevant Facts And Assumptions

### 5.1 Relevant Facts

*Insert your content here.*

### 5.2 Business Rules

*Insert your content here.*

### 5.3 Assumptions

*Insert your content here.*

## 6 The Scope of the Work

### 6.1 The Current Situation

*Insert your content here.*

### 24.1 User Documentation Requirements

*Insert your content here.*

### 24.2 Training Requirements

*Insert your content here.*

## 25 Waiting Room

*Insert your content here.*

## 26 Ideas for Solution

*Insert your content here.*

# 27 Appendix — Generative AI Use Disclosure

[ChatGPT (version 5) was used to brainstorm ideas for the template for this disclose section. —SS]

## 27.1 AI Tools Used

[Give the name of the AI tool(s) used and the version. —SS]

## 27.2 How and Where Used

[Explain what the tool(s) were used for. Examples include: brainstorming, explaining a technical concept, reviewing the document, generating or modifying text, generating or modifying diagrams, identifying errors or omissions or inconsistencies. —SS]

[For each of the uses, identify which parts of the document were affected. —SS]

[You do not need to report every interaction, but you should disclose the uses that materially contributed to your work —SS]

## 27.3 Verification of AI-Generated Content

[

- Describe how the team checked AI-generated or AI-assisted material before including it in the document.
- In particular, verify factual claims, technical assertions, requirements, calculations, references, and other information for which an AI system may produce incorrect or fabricated results.
- **The team is responsible for the accuracy, completeness, consistency, and appropriateness of the submitted document, regardless of whether material was generated by a human or an AI system.**

—SS]

# 28 Appendix — Reflection

The purpose of reflection questions is to give you a chance to assess your own learning and that of your group as a whole, and to find ways to improve in the future. Reflection is an important part of the learning process. Reflection is also an essential component of a successful software development process.

Reflections are most interesting and useful when they're honest, even if the stories they tell are imperfect. You will be marked based on your depth of thought and analysis, and not based on the content of the reflections themselves. Thus, for full marks we encourage you to answer openly and honestly and to avoid simply writing "what you think the evaluator wants to hear."

Please answer the following questions. Some questions can be answered on the team level, but where appropriate, each team member should write their own response:

1. What went well while writing this deliverable?

2. What pain points did you experience during this deliverable, and how did you resolve them?

3. How many of your requirements were inspired by speaking to your client(s) or their proxies (e.g. your peers, stakeholders, potential users)?

4. Which of the courses you have taken, or are currently taking, will help your team to be successful with your capstone project.

5. What knowledge and skills will the team collectively need to acquire to successfully complete this capstone project? Examples of possible knowledge to acquire include domain specific knowledge from the domain of your application, or software engineering knowledge, mechatronics knowledge or computer science knowledge. Skills may be related to technology, or writing, or presentation, or team management, etc. You should look to identify at least one item for each team member.

   **Marko:** I have some knowledge in game development, but I currently lack the hands-on experience with database management specifically for a game engine context. I understand SQL and security well enough, as well as game engines like Godot, but as for bridging the gap between them, I am unfamiliar with the best practices.

6. For each of the knowledge areas and skills identified in the previous question, what are at least two approaches to acquiring the knowledge or mastering the skill? Of the identified approaches, which will each team member pursue, and why did they make this choice?

   **Marko:** A good approach is online research and finding learning resources for this problem specifically. I could also personally ask actual industry professionals with past experience in the area how they would do it. And then, I could practice on a mini side-project that uses Godot and bridges data to an online SQL hosting service, so that I get hands-on mastery of the skill.
